Shenzhen Winsolar Technology Co., LTD

Website: www.winsolar.org

Quality & Design

Shenzhen Winsolar Technology is a company that relies on quality. We began our trip in 2007 with an "Art of State" established in Shenzhen, China, to trade with solar modules, solar energy systems and other products and innovative solutions for the ideal use in everyday life.

With good growth and in order to satisfy the market revolution, we started manufacturing solar lighting in 2013. Over these years, Winsolar has gained considerable experience in the design, engineering, manufacturing, integration and installation of a wide range of solar lighting products using the latest technologies and practices. It has been a great learning experience for all our team and each of us from Winsolar always offer the best to take the brand to the highest level.

Our goal is to form a leading company in the field of solar lighting and to build a favorable environment for the environment. We make sure to establish the qualified and innovative solar garden and offer solutions for public lighting in order to meet the demand of all our customers.

SHENZHEN WINSOLAR Technology is popular for its various international business activities related to solar energy products and solutions all over the world.

unique to your specific application.
- **Smart Solar Controller**
Applied in solar lighting system to Manage power efficiently and intelligently for more backup. Auto dim off brightness when battery low and Bring the brightness up when battery low.

Culture & Value

The quality speaks. Qualified and diligent workforce. Satisfied customers.

Quality speaks: We appreciate the quality and standard of the products we offer at the top of market demand. Our goal is to get more valuable products and services. So the business relationship can be maintained long term.

Customer satisfaction: Our goal is to deliver innovative solar solutions to help customers meet specific requirements. Even our goal is to be considered as a famous company specialized in solar lighting both in China and around the world.

Confidence and commitment to quality: For us, each client is equally important and we comply with the highest standards at all levels of the business.

Commitment to the environment: Solar energy is favorable to the environment and our effort is to promote the benefits of solar energy to protect the environment.

Unrivalled quality: We attach great importance to quality and this is achieved with the help of previously defined parameters for all products / services related to solar energy. We immediately follow these processes closely to the different levels of the business.

Motivated team: For WINSOLAR, our employees are our greatest asset. They have made an enormous contribution to the growth and good reputation of our company. We foster a very favorable work culture that focuses on self-learning, sharing knowledge and excellent performance as a team to achieve organized motives.
